Patriot rising beam barriers offer the highest level of protection for entry control access. Traversing a maximum distance of 24’, the Patriot beam barrier blocks entire roadways from any potential threat or unauthorized vehicle.

- Installing the rising beam barrier within close proximity to an entry point enables the Patriot to work in tandem with a gate system to control vehicular traffic.
- The Patriot crash beams’ primary excavation is outside the roadway opening, allowing minimal excavation across entry, thus avoiding underground utilities or obstructions.
- Deployment rate of only one second when EFO (emergency fast operation) control is added to this system.
**ANTI-RAM CERTIFIED CRASH BEAM**

**CRASH BEAM**

**STANDARD FEATURES**
- Standard Openings / 12', 16', 20' & 24' (available in custom sizes in 2' increments up to 24')
- Barrier-Down Position Sensor
- Painted Finish
- Weather Proof HPU Enclosure
- HMI PLC & Programming
- 2 HP Hydraulic Power Unit
- 208-240 VAC / 60 HZ / 3-Phase
- Manual Hand Pump

**OPTIONAL FEATURES**
- Main Operator Control Panel
- Remote Operator Control Panel
- Barrier-Up Position Sensor
- Hydraulic Oil Heater / Cooler
- Emergency Fast Operation (EFO)
- Dual Channel Vehicle Detector Module
- Traffic Light Signals
- Custom Painted Finish
- Battery Backup
- Touch Screen Controls
- Radio Controls
- Wrong Way Detection
- Over-Speed Detection
- Integrated Traffic Arm or Sliding Gate
- 5 HP Hydraulic Power Unit

**ELECTRICAL OPTIONS**
- 120 VAC / 60HZ / SINGLE PHASE
- 208-240 VAC / 60HZ / SINGLE PHASE
- 415-480 VAC / 60HZ / 3-PHASE
