Titan anti-ram security bollards combine an open aesthetic appearance with the highest level of perimeter control. The Titan crash tested bollards provide free movement of pedestrians and are available in a variety of operating configurations. Utilizing the highest cycle duties available, the Titan security bollards are an economical and effective way of protecting any entry.

- Deployment rate of only one second when EFO (emergency fast operation) control is added to this system
- Guarding at a height of 38" the 10.75" diameter Titan is available in an automatic operation
- Titan bollards offer low operating and maintenance costs and are ideal for securing entrances where installing larger systems could become price prohibitive
